BLACK PERFORATED TEXT MIRROR

Text Textile Collection

Product Description

Black Perforated Text Mirror is a laminated textile and mirror glass in which typography is formed through perforations in a dense black textile membrane. The letterforms are chemically removed from the fabric, creating openings that allow light and partial views to pass through the glass surface. The contrast between the dark textile and the perforated letters creates a strong yet refined visual presence. Small textile residues remain preserved within the laminate, maintaining the tactile qualities of the material and revealing the transformation of the fabric. On the front glass surface, a mirrored outline of the same text is precisely aligned with the perforated textile layer. The interaction between dark textile, light transmission through the letters, and mirrored reflection creates a layered architectural surface where text functions simultaneously as message, structure, and spatial filter.

Material & Construction

- Laminated textile and mirror glass
- Textile layer: dense black textile with chemically perforated letterforms
- Mirror layer: mirrored text outline applied to glass surface
- Residual textile fibers preserved within the laminate
- Perforated textile structure embedded within laminated glass
- Double-sided visual depth through textile openings and mirror layer

Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

Applications

Wardrobes · Sliding panels · Office partitions · Architectural interiors

Customization

Text content, typography scale, textile type, mirror finish, and panel dimensions can be adapted according to architectural project requirements.

Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
