## LARGE BLACK SQUARE

### Square Hole Series

### Product Description

Large Black Square is a laminated textile glass produced from densely woven black cotton that is chemically perforated with ten-millimeter square openings before lamination. The larger grid introduces a strong architectural rhythm while maintaining the depth and material presence of the dark textile. From a distance, the surface reads as calm and monolithic. As one approaches, the square openings and textile fibers become visible, revealing subtle irregularities preserved within the laminate. Light passing through the perforations introduces controlled transparency while maintaining privacy and spatial separation. Large Black Square creates a visually strong yet restrained architectural material. The combination of dark textile and structured geometry produces depth and rhythm without becoming visually dominant.

### Material & Construction

- Laminated textile glass
- Textile layer: densely woven black cotton textile
- Chemical perforation with 10 × 10 mm square openings
- Grid structure preserved within laminated glass
- Visible textile fibers embedded within the laminate
- Double-sided visual effect through textile structure

### Technical Information

- **Thickness options:** 8 / 10 / 12 / 16 mm
- **Maximum panel size:** up to 2000 × 3000 mm
- **Processing:** CNC cutting, edge polishing, custom formats
- **Safety:** laminated; tempered laminated on request

### Applications

Meeting rooms · Sliding systems · Feature partitions

### Customization

Perforation density, textile type, panel dimensions, and transparency levels can be adapted according to architectural project requirements.

### Maintenance

Clean with standard glass cleaner and a soft cloth. Avoid abrasive materials.
